# The idea:

# Stop lup music books or folders to the show. All notes in the computer, and when calling up and displaying a sheet music file it is also best to automatically set the Keyboard correctly to the title.

## ATMObyte Böhm classic-Edition is a complex software, with an

unlimited number of titles and the associated notes or texts in <u>PDF format</u>. The titles can be distributed to any number of playlists. Titles can be assigned to 12 different <u>set's</u> and the desired set can be activated with one click.

For each title, a sound file in mp3 format can be deposited and played as required. For each title, a video file (mp4) can be stored and played on a second monitor or projector as needed.

With the scanning function integrated in *ATMObyte Integra-Edition*, existing paper notes can be scanned directly. The correct assignment and saving in <u>PDF format</u> are automatic. Of course, already existing PDF files can be used. Calling a title not only displays the corresponding notes, but the title-related registration of the connected **Keyboard** is called automatically.

The software runs under all <u>Windows systems</u>.

Mac systems require the installation of VMware Fusion beforehand. If a tablet computer is used, the software automatically adapts to the position of the tablet. When used vertically (portrait), the display automatically switches to 1-sided display, so that the sheet of music is displayed on the entire display. **ATMObyte Integra-Edition** but only start when the desired position of the display is done.

# **1.1 Installation from CD**

After inserting the CD into the computer, the installation program starts automatically. If this does not happen please start the file *InstallBCE.exe* on the CD with a double-click.

## 1.2 Installation of the download version

In the download version, the program is automatically installed.

## The following menu options are now available:

Roland Integra - Edition	install program for ATMObyte ROLAND Integra-Edition
ATMObyte ROI Integra - Edit	
install	
manual 🏭	
exit×	

The *ATMObyte Integra-Edition* installation routine installs the program on your computer. The installation directory can be chosen freely and is preset to **C**: \.

Installation is not possible in the directories **C: \ Programs** and **C: \ Programs (x86)**. These directories are systemically important. An installation would only require a change in the registry be possible and that should be avoided.

Seite 4 von 58

Only the folder **ATMObyte Integra-Edition** with all files belonging to the program will be copied to the hard disk and no changes are made to the system or the REGISTRY.

During the installation this message can come from Windows Defender,

but that has to do with Microsoft and their caution and not with problems or dangers of the software itself.

Of course, Windows knows neither the program nor the manufacturer, so security is important first. You also get this message when installing many other programs.

The installation is carried out by clicking on **More information** and then on **Install anyway**.

When first started, the software starts as a <u>DEMO version</u>. To license the software, from the <u>DEMO version</u> to make a <u>full version</u>, the entry of a license code is necessary.

The entry is made in the menu item SERVICE under license.

For the creation of the license code the serial number is always necessary.

#### First steps

After the software is installed, it can be started.

At the first call the software starts as DEMO version. In the DEMO version the software can be extensively tested.

The only limitations are that the notes are overwritten with **DEMO**.

All other functions, including the keyboard control, are fully usable.

If a license code is available, the software can be registered with this code and is a full version.

If you want to call up the registration of the keyboard for the title you are calling, so the keyboard must first be set once to the correct <u>MIDI channel</u>.

This channel is specified by **ATMObyte Integra-Edition** and can be changed under <u>Service-> Settings</u>. When installing **ATMObyte Integra-Edition** for the first time, this is channel 16.

## Organ settings

To use the registration call of the connected organ just change the <u>MIDI setting</u> of the organ as follows:

If the MIDI channel 16 is used, the following settings apply to the organ: MIDI IN Channel 16

#### **DEMO** version

At the first call the software starts as DEMO version. In the DEMO version the software can be extensively tested.

The only limitations are that the notes are overwritten with **DEMO**.

All functions can be used without restrictions.

Now these registrations can be addressed by the program during the title selection.

#### FULL version

In the full version, is after entering a correct license code, all functions listed in the description are executable. The coverage of the notes with **DEMO** in the DEMO version is no longer visible.

#### menu bar

The individual functions of ATMObyte Integra-Edition can be called up via the buttons in the menu bar.

A Titelliste16 - GENOS					—
program	title	titlelist	Service	PRESETs	
• title A-Z	— search for O title part	O <b>keyword</b> Set: Alle S		☑ Software Control	Roland Integra - Edition

With *program* the *Roland Integra* can be stopped

With *title* a title can be used to create a title a title will be deleted a title will be copied a title will be rename

With *Titlelist* a new titlelist can be create a titlellist will be deleted a titlellsit will be renam

*Service* switches to the settings area of the program and important program properties can be changed.

With **PRESETs** the 20 available PRESETs are called. These can be edited and / or played.

Keyboard on / off displays or hides an on-screen keyboard.

With the *country flags* the language of the program can be changed.

The switches Software Control affect the control behavior of *ATMObyte Integra-Edition*.

If the switch Software Control is deactivated, the registration will be made for a title call the organ does not change. Only the notes are displayed. This allows playing a variety of titles with the same registration of the organ.

#### Title

A title is an entry in one of any number of <u>titlelists</u>. The number of titles in a <u>titlelist</u> is unlimited.

A title is called by its name.

This name also assigns the notes and any existing mp3 files or video files to the title.

These files must be named exactly as the title. If the <u>title</u> is Yesterday, the corresponding sheet PDF is Yesterday.pdf. The mp3 file Yesterday.mp3 and the video file Yesterday.mp4.

If **ATMObyte Integra-Edition** internal <u>scanning</u> program is used to scan the scores, this will automatically generate the name of the <u>PDF file</u> correctly and the sheet music is stored in the directory. \ PDF \ Display1. The selection of a title can be done in different ways.

Mauscrollwheel

The scroll wheel of the mouse scrolls through the title list.

#### arrow keys

Use the arrow keys to the left of the title list to maneuver.

#### **OnScreenKeyboardr**

The title is selected using the screen keyboard below the title list. The on-screen keyboard can be displayed and hidden as desired. This is done by means of the keyboard on / off button.

#### keyboard on/off

QWERTZUIOFUI	2789 8
9 K S D F S H J K L Š A 19	- 4 5 5
Sel Y X C V B N M Lestack	CL23 Erler

All functions can be performed by mouse or with a touchmonitor by finger.

Searching for a <u>title</u> using the on-screen keyboard or the PC keyboard can be done after the <u>title</u>, is alphabetically or it can also be searched for a letter sequence in the <u>title</u> name. To do so, select Search for below Title bar or Title content below the menu bar.

	search for	
• title A-Z	$\odot$ title part	○ keywords
		Set: all songs

If the <u>title</u> search is set to the beginning of the title, the first title that starts with **B** is selected by entering the letter **B**. If one enters now the letter **A** one ends up with the first title with the initial letters **BA**, e.g. Baker Street. If you enter an **R** and there is no title with the initial letters **BAR** in the title list, the first title is immediately marked with the initial letter **R**. During the title search for content, the entered letter sequence does not have to be at the beginning of the <u>title</u>, but may be somewhere in the title name.

All titles are then displayed in which the entered letter sequence exists.

If you enter e.g. If you enter the word ROSE, all titles appear with this letter sequence.

When searching for keywords, the middle touch panel displays all the keywords used in the program.

Title	Bank	Register	Set1	Set2	keywords

#### **PDF synchron**

This feature finds the PDF files in the **PDF\Display1** directory, that are not present in the current playlist. If you want to create a title from a displayed PDF, just click on the PDF and in the current title list a title with the name of the PDF is created.

Via **print list** a list with all PDF files in the directory **PDF\D isplay1** is printed out. The PDF's for which a title exists in the current playlist are marked with an **X**.

#### ListPDF

SETs are the selections for the playlist, which are located on the right edge of the screen. The title list can be limited by the **SETs** to certain selection ranges

To assign a title to a **SET**, a star is generated for this title in the matrix for the relevant **SET** with a click. A further click on this field deletes the marking

Titel	Register	Set1	Set2	Set3	Set4	Set5	Set6	Set7	Set8	Set9	Set10	Set11	Set1
!aaaa	1												
!Test 3 Seiten	1	*											
54 74 90 Stiller	478	*		*									
7 Tage Sonne	237	*		*			*						
8 Seiten	1	*	*				*						
A women in Love	1	*	*				*						
Alexis	139	*					*

All shook up	120	*				*							
All you need is love	197	*											
Alles im Griff	457	*							*				
Aloha Hea	472	*											

If you now click on a **SET** on the right side of the screen, only the titles appear in the <u>title list</u>, which have been assigned to the **SET**.

The SET selection can also be made by clicking on the corresponding column header.

Set1	Set2	Set3	Set4	Set5	Set6	Set7	Set8	Set9	Set10	Set11	Set12
*											
*		*									
*		*			*						
*	*				*						
					-						

The names for the **SETs** can be changed by clicking with the right mouse button on the **SET** name. If no name is entered for a **SET**, the name is automatically entered as the name.

### Tilellist

A title list can contain an unlimited number of titles.

Any number of titlelists can be created.

At the first program start, the playlists are **Titelliste00-DEMO** set with 20 titles as DEMO playlists.

If title ists are created, they start with the number 21.

Creating a new titlelist is done in the menu bar with titlelist-new.

An input window opens and the name of the new list can be assigned.

Enter a short name for the titlelist. (for example Christmassongs)						
cancel	next					

The self-created titlelists start with the number 20 and are numbered consecutively, e.g. Titlelliste20 Christmas.

If the new title list is successfully created, this is confirmed.

i	crea	Titelliste20 teted you can use	
		OK	

Via *titlelist-> Rename* in the menu bar, the name of the titlelist can also be changed later.

titlelist

	change new delete rename	i I					
Kurzbezeichnung von: Titelliste05 <b>Tyros5</b>							
Neu	Neue Kurzbezeichnung:						
Tyros5							
abbrech	en übe	ernehmen					

Deleting a title list is done with *titlelist-> delete* in the menu bar.

By clicking on the corresponding titlelist and confirming the deletion query, the selected titlelist is deleted.

The active titl list and the DEMO Titellliste00 can not be deleted !!!

The change between the existing title lists is done by means of *title list-> change* in the menu bar.

In the opening selection window all available titlelists are listed. Click on the desired titlelist to activate it immediately.

## Each title includes a score PDF. This is located in the folder **PDF\Display1** or **PDF\Display2**.

If notes are already available in PDF format, they can be used. They just need to be copied to the directory **PDF\Display1** or **PDF\Display2**.

By default, the notes from the **PDF\Display1** directory are used. However, if activated under *SERVICE* **Display2**, the notes from the **PDF\Display2** directory are used. In this way the titles can be assigned different note images.

After the scanning process, the notes are automatically stored in the correct folder and can be immediately called up and displayed with the title.

> There are no further entries like name of the <u>PDF file</u> or number of pages of notes necessary for the <u>title</u>, since this is done automatically by the program.

By clicking on the title name or pressing the *ENTER key* the sheet music for the title is displayed.

*By clicking on the title name or pressing the ENTER key* In this case, it is a title with several Notidenitenamae.

you go back to the title selection.

If the PDF file has multiple pages and scrolling is necessary, the required buttons for turning pages are visible.

Turning pages can also be done with a *footswitch* or with a fingerwash (touch screen).

If an mp3 file is available, it can be started via the *mp3 button*. This button is only visible if an mp3 file belonging to the title exists.

Whether the control button should appear to the left or right of the notes, can be set under **SERVICE-> Settings** by clicking on the corresponding switch.

s a rule, two-page sheet music always displays 2 pages in parallel. In principle, a 1-sided display is desired, e.g. with small monitors, this can also be set under <u>SERVICE settings</u>.

The note display can also be inverted. The notes then appear in white on a black background. This option should be applied to the display in case of strong light.

#### Video

For each <u>title</u> a video can be deposited. The videos are always in the directory *VIDEO*.

If there is a video for a <u>title</u>, it will do so in the menu bar with **video** displayed.

Click on this button to test the video playback.

The supported formats is: mp4.

# If you want to start the video with the title call, then **Service-> Settings** to put a hook on **video-automati**c.

Is a 2nd screen or projector connected to the computer, so the video is played on this.

If a video is not played, that's because of the missing codec for this format. The missing codecs can be installed by looking in the **VideoCodec directory** of the program Run the file **STANDARD\_Codecs\_v651.exe** and then restart the PC. You can access the PRESETs via **PRESETs** in the menu bar. Up to 20 presets can be created. If a PRESET is provided with <u>titles</u>, the label of the corresponding button is black. For empty PRESETs the label is gray.

In a PRESET any number of <u>titel</u> can be stored in any order. The order can be changed at any time, as well as the content of a PRESET. To edit a PRESET, right-click on the corresponding preset or select the desired preset with a double-click for editing. Now the PRESET is opened for editing and on the left side all <u>titles</u> of the active <u>titlelist</u> are displayed.

Double-clicking on a <u>title</u> in the <u>titlelist</u> will copy it to the PRESET. It is inserted under the blue marked <u>title</u> in the PRESET. Its position can be changed arbitrarily with the arrow keys. The PRESET can be given a name.

presetname change	
seret	
title	playtime
6	ca. 15 Min.

The number of tracks contained in the PRESET and the approximate playing time of the entire PRESET are also displayed.

Close will save the PRESET.

To start a PRESET, just click on the corresponding button. Now the first <u>title</u> of the PRESET is called up and the notes are displayed.

next

Via

A click on immediately calls up the next <u>title</u>. So you can put together complete programs in the PRESETs and retrieve as needed.

with back the previous <u>title</u> is called.

If you do not want to start a PRESET with the first <u>title</u>, select the edit mode of the corresponding PRESET and double-click on the desired start <u>title</u>. The PRESET will now be played from the start <u>title</u>.

#### **PRESET** copy

To copy a **preset**, drag the **preset** to the new **preset** while holding down the left mouse button. Then the complete content and the name of the **preset** will be copied. All basic settings are made in the **SERVICE-> expanded**. This affects the MIDI settings, the display and the GEMA settings. Likewise, a complete backup can be made and there is the possibility of a remote maintenance by TeamViewer.

ttings <u>Instrument</u> Roland Integra	MIDI - setting MIDI-channel MIDI-IN device 16 V UM-ONE	S	Roland Integra - Edition
<u>display</u> o single page o double page invert Videoautomatic	r warden beneficial warden ben	program backup	CALPHA service@alpha-medialine.de Online Support - click -
		Programmupdate	close

The basic MIDI settings for keyboard control are in the Program part **SERVICE expanded** made.

<u> MIDI - Einstellungen</u>		
Instrument	MIDI-Kanal	MIDI-IN device
ab Böhm Diamant 280	<b>16</b> ~	UM-ONE ~

MIDI channel is the MIDI channel set on the keyboard. In our example, this is channel 16.

The USB-MIDI driver used is the USB to MDI adapter used. In this case, it's a Roland UM-ONE. With a click on *program update* in the **expanded area** is checked automatically whether a new program version is available for download on the Internet.

The new version of the program can then be downloaded from the Internet by clicking **Start Update**. The prerequisite is, of course, that the PC is connected to the Internet. equipment

footswich

footswich

**Bluetooth** 

**USB** 

## **PageFlip Dragon**

This foot switch - PageFlip Dragon - can be connected via Bluetooth as well as via USB. It is freely programmable via Bluetooth. If the footswitch is to be used only for turning pages, So the type - PageFlip Firefly - which can also be connected via Bluetooth is sufficient. The footswitches are also preprogrammed for AKcontrol and offered with the software.

With the PageFlip Dragon it is e.g. possible:

Select title Call up titles to turn the page play different Tusch's etc. Seite 50 von 58 If you have further questions, contact the manufacturer of *ATMObyte Böhm classic* (info@alpha-medialine.de).

**USB** 

Function in the program part Notes: Left foot key: Title list scroll backward Right foot key: Title list scroll forward Middle foot key: Call up titles

<u>Function for note display:</u> <u>Left foot key: to scroll backwards to the previous track or notes</u> <u>Right foot key: scroll forward through the next track or notes</u> <u>Middle footswitch: start sound or next track</u>

Thus, the software is also very suitable for musicians who do not use a keyboard but want to access a large pool of notes in the computer, e.g. Accordion player or sax player etc.

If the footswitch is only needed to turn the notes, a 2-button footswitch is also available. The foot switches are preprogrammed for **ATMObyte Integra-edition** and offered with the software. AKcontrol can run on all Windows systems as of Win XP, even under Win 10.

On MAC systems AKcontrol also runs, but VMware Fusion must be installed beforehand.

There is no special power required from the PC. The standard computers offered today meet the requirements of the software.

> ALL IN ONE PC's are best suited with a touch screen. You only have one device. These PCs are available in different sizes.

For a fixed installation on your home keyboard, this can be a bit bigger screen, about 23 ".

On the go, a tablet, netbook, transbook or notebook of about 13 "is enough.

To use the internal help documentation), there are 2 possibilities. The first option is to press the *F1 key* on the keyboard. The second possibility is the call via **Service-> Help** in the menu bar.

#### How can I simulate the right mouse button with a finger on a touch display?

### Very easily.

Leave your finger on the desired position of the display (about 1 second), until a mark becomes visible around the finger (Win7 a square, Win8 and Win10 a circle). This basically applies under Windows and not only for *ATMObyte Integra-Edition*.

#### remote maintenance

In the area **SERVICE-> expanded** can with a Click on remote maintenance to connect to the internet. It then starts the remote maintenance program TEAMVIEWER. This allows direct help via the Internet.

display mode         o single page         o double page         invert         ✓ Videoautomatic             Button L / R             Videoautomatic	MIDI - set         Instrument       MIDI-channel       MIDI-IN         Roland Integra       16       UM-ONE		Roland Integra - Edition
	<ul> <li>single page</li> <li>double page</li> <li>invert</li> </ul>	program backup	service@alpha-medialine.de Online Support

#### Enter comments in sheet music

The existing PDF notes in ATMObyte can easily be supplemented with additional comments, etc.

Select the title, but do not call the notes yet and press F10 on the PC keyboard.

Now the PDF file with the notes is opened with the PDF program, which is set as the default program under Windows.

In general, this is e.g. the free **Acrobat Reader**. More recommendable is the free program **FOXIT READER**. Of course, any other PDF program can be used with the edit function.
